### Details

This vintage ceramic lamp by California Ceramic Designers Inc. features a Southwestern landscape around the circumference with three nicely detailed stamped bison centered in the front. The scenery is reminiscent of the familiar representations found in Native American art of the natural world.

It's in good condition without any chips, cracks, or repairs, and it is in working condition. The electrical cord, on-off socket switch, and felt base are good. The brass on the harp and the branches are also in good condition. The lampshade is not included since it is not in good condition, and shipping would be more expensive than a new one.

The shade's dimensions should be D 17.5 x H 12.5.
